WORK EXPERIENCE

Junior Frontend Developer

Science Infinity Technology Limited, Sep 2025 –Jan 2026, Hangzhou, China

Context: Frontend development for an AI-assisted content generation and workflow system

Interactive Media Generation Platform

Tech Stack: React, TypeScript, Zustand, Swiper, i18n, RESTful APIs

- Built a reusable media preview component supporting dynamic video sources and custom playback controls, including seek interaction and speed adjustment
- Implemented cross-page favorite state management using Zustand with localStorage persistence, ensuring UI consistency during asynchronous updates across different views
- Developed a multi-step media generation flow covering file upload, resource ID retrieval, nested modal interactions, and sequential API requests with intermediate state handling

Review Submission & Admin Management System

Tech Stack: React, TypeScript, Zustand, Ant Design, RESTful APIs

- Built a review submission flow allowing users to upload screenshots, submit requests, and track status history
- Developed an admin moderation interface supporting filtering, status updates, and multi-condition search for submitted content
- Handled complex hierarchical multi-select tag logic by normalizing parent-child relationships and resolving duplicate backend selections
